

G-Bulb® blind rivets

G-Bulb® – high strength blind rivets – in carbon steel and stainless steel

G-Bulb® blind rivet

GESIPA® has developed a new range of high strength structural blind rivets called G-Bulb® with diameters of 4.8 and 6.4mm in steel and A2 stainless steel, to fit grip ranges from 1.5 up to 15.5 mm.

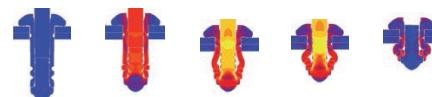

The G-Bulb® rivet features a wide grip range, together with high shear and tensile strengths generated by the rivet function, the formation of a large closing head and the mechanical lock of the rest mandrel in the rivet body.

In combination with the patented function crimping on the rivet body, the G-Bulb® provides tight and sealed joints in a large variation of hole sizes.

The G-Bulb® rivet generates a large closing head which transfers high strain and clamping load to the application. With a mandrel breakload of max. 16 kN, the G-Bulb® rivets can be installed with standard tooling

The setting process

Main features

- Excellent hole filling capability
- High clamping force
- Excellent tensile strength through large closing head
- Excellent shear strength through mandrel locking
- Processing with standard setting tools
- Process control compatible with the TAURUS® C
- RoHS compliant

Materials

Rivet body: Steel, zinc plated CrVI-free, or stainless steel A2 no. 1.4567, Mandrel: Steel, zinc plated CrVI-free, or stainless steel A2 no. 1.4541
